## Information of student:

Name: Fatimah Hassan  
Email: [Fatimahh216@gmail.com](mailto:Fatimahh216@gmail.com)  
Phone: 0547880602  
Major: information system  
Project Name: Newmain

## Introduction:

This is Report that explain what the project. This project aims to display list of files and make user able to make some action on them like add, Delete, search and return bu using JAVA language in netbeans program.

## Use case Diagram:

## Algorithem:

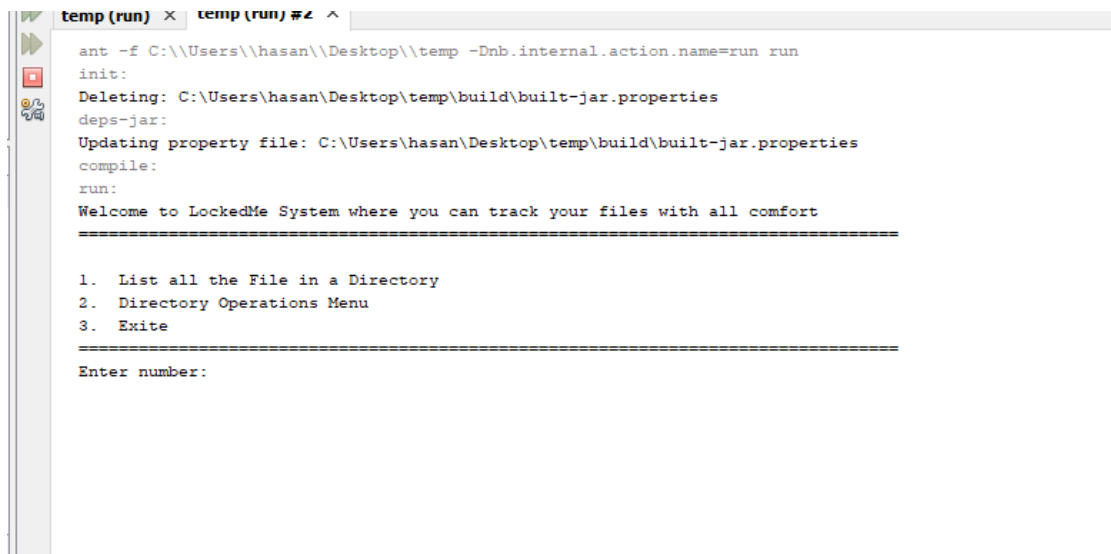

The algorithem that used is sorting to sort the files.

## Sprint:

shows the planning for 3weeks:

Sitting	Designing	implementation
<ul style="list-style-type: none"><li>-collect the specification</li><li>-determine product capability</li><li>-clarify user interaction</li></ul>	<ul style="list-style-type: none"><li>-design use case</li><li>-design algorithm</li><li>-design DS</li></ul>	<ul style="list-style-type: none"><li>-implement DS</li><li>-implement algorithm</li><li>-test the code</li></ul>

## screenshot of program:

```
temp (run) x temp (run) #2 ^
ant -f C:\\Users\\hasan\\Desktop\\temp -Dnb.internal.action.name=run run
init:
Deleting: C:\\Users\\hasan\\Desktop\\temp\\build\\built-jar.properties
deps-jar:
Updating property file: C:\\Users\\hasan\\Desktop\\temp\\build\\built-jar.properties
compile:
run:
Welcome to LockedMe System where you can track your files with all comfort
=====

1. List all the File in a Directory
2. Directory Operations Menu
3. Exite
=====

Enter number:
```

```
temp (run) x temp (run) #2 ^
1. List all the File in a Directory
2. Directory Operations Menu
3. Exite
=====
Enter number: 2

Please Select from the menu below:
1. Add new File
2. Delete a File
3. Search for a file
4. Return to MainMenu
Enter number: 1
Enter the Directory Path: C:\xampp\htdocs\aeq_old\pages\questions
Enter the File name: queation
File Created Successfully

Please Select from the menu below:
1. Add new File
2. Delete a File
3. Search for a file
4. Return to MainMenu
Enter number: |
```
